

Total and Corbion are joining forces to bring innovation to the bioplastics market by creating a 50/50 joint venture. The JV, named Total Corbion PLA BV, will produce and market polylactic (PLA) polymers. The two partners are investing 150MM\$ in bioplastics and are building a world-class PLA polymerization plant with a capacity of 75,000 tons per year at Corbion's site in Thailand. During the presentation more details will be provided about synergies and benefits of the Total Corbion collaboration. Details regarding the innovative product portfolio that the JV will ring to the market will also be provided.
